## Comments

(Set forth by above question #, if applicable. Use "Additional Comments" Sheet, if needed)

File #: 95A-HQ-105230	JO	
#1: With microscopic hair co	emparison, one cannot determine from the notes that the exa	amination was conducted
in an appropriate manner.		
#2: Documentation is poor. T	The notes are not dated or initialed and are in pencil instead	of ink. Abbreviations are
used that are not readily inter	preted. Some of the hairs recovered from Q items are mark	ed as "NSFC".
Presumably, this means "Not	Suitable for Comparison", but there is no documentation a	s to what makes these
hairs unsuitable.		
#2: Apparently, confirmation	of the hair match was made by a second qualified (?) hair	examiner.
